Bijlage van Peeters, T. & H. Nieuwenhuijsen, 2023. Herinneringen aan Rinus Sommeijer (1944-2023) – HymenoVaria 28: 6-8.

Tot op heden hebben we van Rinus 204 artikelen, verslagen of mededelingen bij elkaar gesprokkeld. Rinus heeft ook veel redactioneel werk verzet maar dat is in het onderstaande overzicht niet meegenomen. Voor deze lijst is gebruik gemaakt van diverse bronnen. De meeste stukken vonden we op de onderstaande websites. Lang niet al die stukken zijn door ons gezien, dus fouten of onvolledigheden in de referenties zijn niet uit te sluiten.

Luc de Bruijn, een goede vriend van Rinus schreef ons: 'De film 'La Mariola' is een van de laatste projecten waaraan Rinus werkte. Aan de hand van filmmateriaal dat we zelf opnamen in Diergaarde Blijdorp in Rotterdam, hebben we een documentaire van iets meer dan een half uur gemaakt over een van de meest algemene angelloze bijen uit Midden- en Zuid-Amerika: *Tetragonisca angustula*. In deze film wordt vooral het gedrag in het nest van deze bijensoort belicht. De eerste vertoning was op 15 september voor familie, vrienden en bekenden in Filmtheater Slachstraat in Utrecht'.
